What Photos to Send

Exactly what our photo app will ask for, so you can get ready.

The easiest way

Use our photo app. It walks you through each area, one at a time, and saves as you go, so you can finish later. Take photos with your camera, or choose them from your gallery.

Good photos let us prepare an accurate written proposal without a visit. Take each wall straight on and as flat as you can, and take each section up close, so every door and drawer can be counted and labeled.

Kitchen cabinets (at least 6 photos, up to 12)

- The whole kitchen from the doorway.
- Each wall of cabinets straight on and as flat as you can, one photo per wall.
- Each section of cabinets up close, so every door and drawer can be counted and labeled.
- One door up close, showing its edge and finish.
- An end panel and the cabinet base.
- The hardware (hinges and pulls).
- Any peeling, wear, grease, or water damage.

Island (at least 4 photos)

- The island from the kitchen side.
- The seating side or back panel.
- Each section up close.
- One door or drawer up close.
- Any damage.

Bathroom vanities (at least 3 photos)

- Each vanity whole and straight on.
- One door or drawer up close.
- The hardware.
- Any water damage or swelling.

Laundry (at least 3 photos)

- Each wall of cabinets straight on.
- Each section up close.
- One door up close.

Built-ins (at least 3 photos)

- The whole built-in straight on.
- Each section up close.
- One door or shelf edge up close.
- Any damage.

What happens next

Good light helps. Add your city or ZIP code if we do not already have it. We typically send a written proposal within 24 hours of usable photos. A person from our team writes every proposal.
