Preparing Your Kitchen

Two simple checklists, one for each visit.

Before the door-removal visit

- Empty any drawers whose fronts do not come off the drawer box.
- Set out any new pulls or knobs you want installed, in a clearly labeled bag.
- Leave a clear path to the kitchen, and note any pets or access instructions.

Most cabinets can stay full. There is no need to empty them for this visit.

Before Day 1 on site

- Clear all countertops before we arrive.
- Empty the top row of cabinets if they are open to the ceiling.
- Empty open cabinet boxes with no door (a microwave niche or glass display), or glass door fronts if they are being refinished inside.
- You do not need to empty other cabinets or drawer boxes. Please leave a clear path to the work area.

Tell us before we start

Let us know about kids, pets, or any sensitivities, so we can plan around them. Your project-specific instructions confirm exactly what applies to your kitchen.
